* This device is not supported when using DJI Neo with some certain devices.

- Audio capture compatibility issues may occur when using some Bluetooth earphones with some of the smartphone operating systems. Make sure to test them before use.
- Connection between DJI Neo and Bluetooth devices is not supported. Connect the device to the smartphone via Bluetooth, connect DJI Neo to the smartphone via Wi-Fi, and then use voice control and audio recording in the DJI Fly app.
- Once the Bluetooth device is connected and selected on the smartphone, the DJI Fly app will use the Bluetooth device as the audio source. There are no options to enable or disable the Bluetooth device in the app.
