

## Bluetooth Device Compatibility List

(for voice control and audio recording via app)

Brand	Model
DJI	DJI Mic 2
	DJI Mic*
	DJI Mic Mini
Apple	AirPods Pro 2
	AirPods Pro
	AirPods 3
Huawei	Freebuds 3 Pro
Samsung	Buds 2 Pro
	Buds 2
Xiaomi	Buds 4
Redmi	Buds 4

### Using RC Control

- When using the DJI RC-N3 or DJI RC-N2 remote controllers to control the aircraft, you can connect the Bluetooth earphones listed above with your smartphone to achieve audio recording via app. Voice Control is not supported.
- When using the DJI RC 2 remote controller to control the aircraft, voice control and audio recording via app are not supported.

\* When using the DJI RC-N3 or DJI RC-N2 remote controllers to control the aircraft, audio recording via app is not supported when your smartphone is connected to DJI Mic.

### Using Mobile App Control

The aircraft does not support direct connections to Bluetooth devices. To use voice control and audio recording in the DJI Fly app, first connect a Bluetooth device to your smartphone via Bluetooth, and then connect the smartphone to the aircraft via Wi-Fi.

	<ul style="list-style-type: none"><li>Some Bluetooth earphones may have audio reception compatibility issues when used with certain smartphone systems. Make sure to test them before use.</li><li>Once the Bluetooth device is connected and selected on the smartphone, the DJI Fly app will default to using the Bluetooth device for audio reception. There is no option to enable or disable the Bluetooth device in the app.</li></ul>
