

# PHANTOM 3

## Prop Guards Installation Guide

dji

## In the Box

Prop Guards x4

Thread x1

Hex Key x1

Screws x10

## Specifications

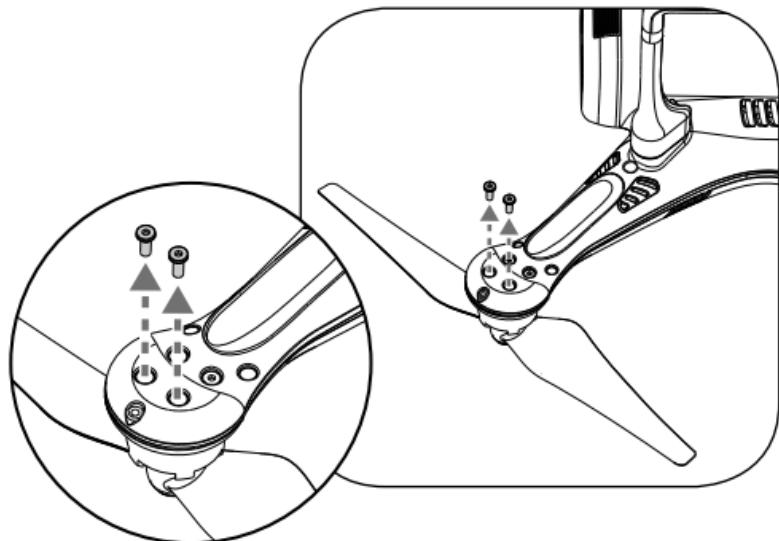

Weight (1pc)	21 g
Angle	155.0°
Radius	131.7 mm
Installed Circumference	612 mm

## Installation

Prepare your Phantom 3, Prop Guards (4pcs), screws (8pcs), thread and hex key.

1

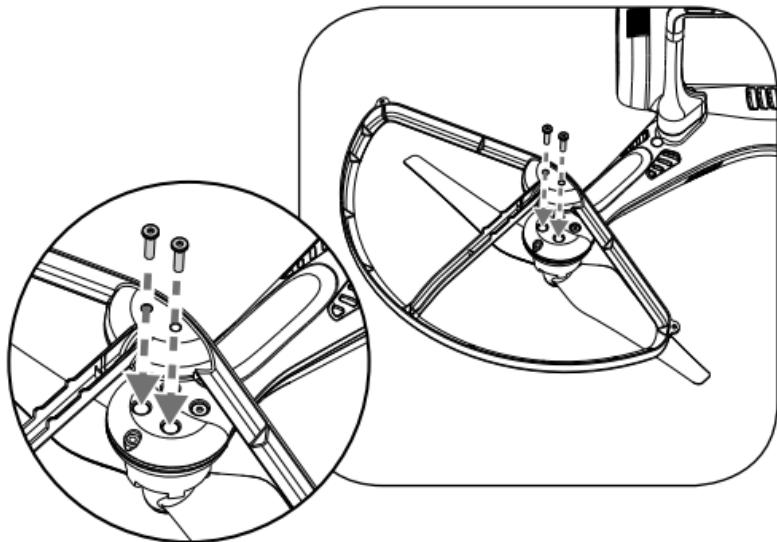

Use the hex key to remove the two outer screws under each of the four motors.

Keep these original screws for when you are not using Prop Guards.

2

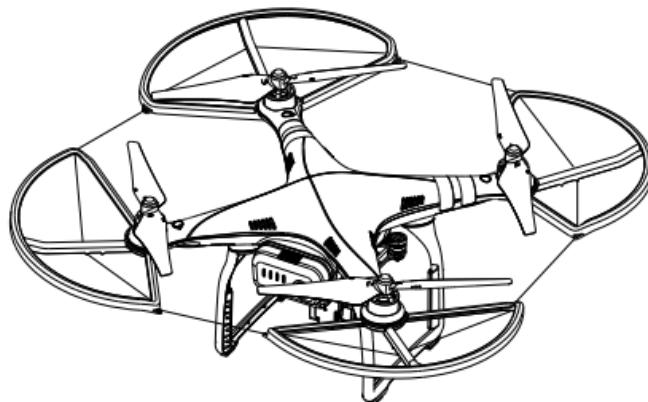

Mount all four Prop Guards onto the Phantom 3 and tighten the Prop Guard screws. Do not use threadlocker.

Only use the Prop Guard screws when Prop Guards are mounted to avoid loose joints or damage to the motors.

3

For better protection, attach the thread so that it runs through and under the Prop Guards.

The content is subject to change.
