

## DJI Mic 2 Transmitter Release Notes

---

Date:	2024.08.09
Firmware Version:	04.05.01.11

---

### What's New

- Optimized EQ (Equalizer) settings for fuller and brighter sound.
- Fixed some known issues.

### Steps to Update

1. Download the firmware on the product page of the DJI official Website.
2. Make sure the transmitter is powered on. Connect the transmitter to a computer using the UCB-C cable provided.
3. Place the downloaded firmware update package .bin file under the root directory of the transmitter.
4. The transmitter firmware updates will start automatically after disconnecting the transmitter from the computer. During the transmitter updating process, the system status LED will flash red and green.
5. After the firmware update is complete, check the firmware version on a camera to ensure the firmware has been updated successfully.
6. If the firmware update fails, download the firmware again, reboot the transmitter, and repeat the steps above. Contact DJI Support if the update fails again.
